nursery planner

Here at Cosatto we reckon it doesn't get much more exciting than planning the room for your new arrival! Simply print out this plan and you can easily work out how to make your fabulous new Cosatto furniture work best in your nursery. We've based our furniture measurements on our best selling Hogarth furniture range. Here's some advice on getting started...

1. First things first - Measure your nursery from wall to wall. Use your measurements to draw onto the grid. Note that each large square on the grid roughly represents 1 metre*.
2. Measure doors and built in cupboards and note whether doors open outwards - allow space and draw on the grid.
3. Measure windows and note the distance from the floor, as you might want to put small storage boxes or trugs below.
4. Cut out our furniture units or use as a guide to mark on the grid yourself - then get planning what works best!

We recommend you don't put the cot (bed) directly under a window, that you keep it well away from any heaters or radiators and also away from draughts!

COSATTO
BABY STUFF WITH PERSONALITY!

* Our nursery planner is meant as a rough guide to planning your nursery. Please make sure you double check all dimensions in baby's room before buying any furniture - we can't be held responsible if it doesn't quite fit!
