Reusable Nappies

Bum Genius nappies

BumGenius! one-size cloth nappies offer an industry first, stretch-to-fit tabs. Our unique tabs provide a comfortable fit and trim look. This simple design makes cloth napping as easy as using disposables. bumGenius! one-size cloth nappies are perfect for care providers who might be resistant to using cloth.

What does it come with?

BumGenius! one-size cloth nappies come with 2 inserts.

How many do I need?

We recommend 20 nappies.

Less Clutter

BumGenius! one-Size Cloth nappies easily fit most babies from 7 pounds up to 35 pounds. One nappy for multiple children simplifies laundry and the nappy drawer. No more sorting by size or having to carry multiple nappies when going out. Three snap-downs on the front of the nappy (patent pending) adjust the rise as your baby grows. For newborns, fold down the insert stopper for an extra-small rise.

Only the best for your baby

The soft, waterproof outer fabric keeps the nappy just as trim on a newborn setting as it is on a toddler. Soft, sueded inner fabric wicks moisture away from your baby's skin. Super stretchy, ultra gentle leg and back elastic with rolled out casings keep the yuk in and to help keep red marks away. Plus, our unique covered (patent pending) pocket opening keeps wetness completely off of your baby. After the nappy has been used, you can even avoid messes in your wet bag by rolling the nappy up and fastening the tabs before storage!

Feel confident in your purchase!

The **BumGenius!** Satisfaction Guarantee gives you two weeks to evaluate your purchase. Try one nappy, use it for two weeks. If you don't like it, send it back along with the others you purchased (still unused and unwashed) and get 100% of your purchase price back.

Product Warranty

BumGenius! products carry the best warranty in the industry. Read more about the warranty details.

Care Instructions

BumGenius! products Remove insert from nappy. Fasten tabs to laundry tabs on inside of nappy. Wash cold, then hot. Use $\frac{1}{4}$ to $\frac{1}{2}$ ($\frac{1}{4}$ for high efficiency machines, $\frac{1}{2}$ in regular machines) of the manufacturer's recommended non bio washing powder. Rinse well. Tumble dry medium.
